About US

Multi-Level Marketing(MLM) and block chain have a similarity they both are P2P models operating in a network. Needless to say amalgamation of the two is a powerful ecosystem. In a MLM model, enterprises incentives the network users for promoting the products in their personal network and increase the chain.

Smart Contract

Smart contracts, like cryptocurrencies, are decentralized. They work strictly according to the underlying program, without the possibility of subsequently changing the defined execution. The code that contains all the logic of the contract expiration is on the block chain and all calculations are provided by millions of computers around the world. This ensures that there is no risk of hacking into the smart contract and stopping the project.
